

Press Release from SpliceCom

SpliceCom Launch 5108 Call Server for Smaller Offices

1st November 2007 - Chorleywood, UK; SpliceCom, the IP convergence company whose award winning **maximiser** platform combines voice, video, IP TV and web enabled IT applications at the desktop today launched their 5108 Call Server for Branch Offices and Small Businesses.

"Over the last year we've seen demand for **maximiser** grow in terms of numbers shipped, average system size and addressable markets," says Robin Hayman, SpliceCom's Director of Marketing & Product Management. "Because of **maximiser's** modular architecture, as we've addressed ever larger customers not only has the system size grown, the number of sites it's distributed across typically tends to increase as well. This has driven the need for a smaller, cost-effective platform, to sit underneath our 5100 Call Server for the smallest offices of large organisations - and indeed small businesses."

SpliceCom's 5108 Call Server supports up to eight users and provides two BRIs and up to eight SIP or H.323 Trunks. All other features are identical to larger **maximiser** systems. "Businesses are demanding that their telephony facilities and applications are available in a consistent nature to all their employees, irrespective of location. The latest addition to our 5 Series family ensures that those working in smaller offices are no longer treated as the "disenfranchised,"" concludes Hayman.

About SpliceCom

SpliceCom is a privately funded company, whose management team were behind the two most successful UK voice and data convergence companies of the 1990's - SDX Business Systems and Network Alchemy. SpliceCom's **maximiser** product family combines voice, video and web enabled IT applications within a single system, providing tangible business benefits for all types of companies, irrespective of their size. Having commenced shipments in early 2003, **maximiser** was voted the "Most Innovative Product" at one of the UK's premier communications trade events, Comms Channel Expo 2004, whilst SpliceCom's PCS 50 for Mac OS X IP Softphone/Phone Partner application picked up the award in 2005. Leading market analysts MZA attributed SpliceCom with a 16% share of the UK IP PBX market during Q.2 2007.
